WEB DEVELOPMENT ACTIVITY BASED LEARNING

1.PERSONAL PORTFOLIO:

1. Problem Statement

In today's digital world, students and professionals need an online platform to showcase their skills, projects, achievements, and personal information. Creating a personal portfolio website helps present their profile professionally and makes it easier for recruiters and others to learn about their abilities.

2. Objectives

- To develop a personal portfolio website using HTML and CSS.
- To showcase personal information, technical skills, projects, and achievements.
- To create a user-friendly and responsive website.
- To provide contact information for communication and career opportunities.
- To improve web development skills and online professional presence.

3. Key Features

- **Home Section:** Introduces the person with a welcome message.
- **About Me:** Displays personal information and educational background.
- **Skills Section:** Showcases technical and programming skills.
- **Projects Section:** Displays completed projects and their descriptions.
- **Contact Section:** Provides contact details or a contact form.
- **Responsive Design:** Adjusts the layout for different screen sizes.
- **Navigation Menu:** Allows users to move easily between website sections.

4. Applications

- **Job Applications:** Helps recruiters review a candidate's skills and projects.
- **Student Profiles:** Showcases academic achievements and practical work.
- **Freelancing**: Helps freelancers present their services and previous work.
- **Internship Opportunities:** Allows students to demonstrate their technical abilities.
- **Professional Networking:** Provides a shareable link to personal and professional information.

- **Project Showcase:** Displays web development and programming projects in one place.
